TOWN OF FUQUAY-VARINA
PLANNING BOARD REGULAR MEETING
July 20, 2026

CALL TO ORDER

Chair Brett Johnson called the regular meeting of the Fuquay-Varina Planning Board to order on July 20, 2026, at 6:00 p.m. at the John W Byrne Municipal Building. Attendees participated in person, and the meeting was available to view online.

Board Members Present:	Brett Johnson (Chair) Barbara Marchioni Michelle Peele Nolan Perry Jay Adcock Tommy Pate
Board Members Not Present:	Jeff Stevens (Vice-Chair) Nander Brown
Others Present:	Planning Director Pam Davison Assistant Planning Director Eliot Ward Senior Planner Allyssa Holman Senior Planner Rachel Mann Deputy Town Clerk Eva Mayfield IT Specialist Jason Miller Town Attorney James Adcock

****

DECLARATION OF QUORUM

Chair Brett Johnson declared a quorum.

****

PLEDGE OF ALLEGIANCE

Chair Brett Johnson led the Pledge of Allegiance.

****

APPROVAL OF THE MINUTES

Agenda Item No. 2.A. – Approval of Minutes - May 18, 2026, Planning Board Meeting.

Purpose - The purpose of this agenda item is to consider approval of the minutes from the Planning Board meeting on May 18, 2026.

Motion – Approve the minutes from the May 18, 2026, Planning Board meeting as presented and recommended.

MOTION:	Jay Adcock
SECOND:	Barbara Marchioni
MOTION RESULT:	Motion Passed 6 - 0

****

PUBLIC HEARING

Agenda Item No. 4.A.: Zoning Map Amendment - Wayne Mauldin, Mauldin Watkins Surveying - 210 S West Street - PIN 0656867994 - REZ-2026-10.

Purpose – The purpose of this agenda item is to consider a requested zoning map amendment for a total of 0.321 acres, located at 210 S West Street, from the Residential Medium Density (RMD) Zoning District to the Town Center Residential (TCR) Zoning District.

Staff Comments – *Senior Planner Allyssa Holman* entered the agenda abstract and supporting documents for this agenda item into the official record of the Town.

Recommendation – Staff recommends approval of REZ-2026-06, a zoning map amendment for 210 S. West Street, from the Residential Medium Density (RMD) Zoning District to the Town Center Residential (TCR) Zoning District as it is reasonable and in the best interest of the public for the reasons identified by staff for the following reasons: 1) The requested zoning map amendment is consistent with the 2040 Community Vision Land Use Plan classification of Town Center Residential (TCR). 2) The requested zoning district supports the LUP's Policy 2.1: Encourage Infill Development & Redevelopment Inside Town Limits. 3) The requested zoning district supports the LUP's Policy 4.1: Manage Future Growth and Development in Accordance with the Priority Infrastructure Investment Areas Map. 4) The proposed conditions offered as part of the petition align with the goals of the 2040 Land Use Plan and effectively plan for the site's future development potential.

Board Member Discussion – There was no Board discussion.

Public Hearing – The public hearing was opened.

Wayne Mauldin, Mauldin Watkins Surveying, 139 N. Main Street, spoke on behalf of the Petitioner. He stated he was in support of the rezoning request, stating that the subject property contains an older home on Southwest Street that is in need of major repairs and that the owner intends to remove the existing structure and construct a new building that will be more attractive and help improve the surrounding community. He offered to answer any questions from the Board.

There were no questions by the Board for the Petitioner.

Public hearing was closed with no further speakers.

Board Member Discussion – There was no Board discussion.

Motion – Recommend approval of REZ-2026-10, a zoning map amendment for 210 S West Street, from the Residential Medium Density (RMD) Zoning District to the Town Center Residential (TCR) Zoning District as it is reasonable and in the best interest of the public for the reasons identified by staff.

MOTION:	Nolan Perry
SECOND:	Tommy Pate
MOTION RESULT:	Motion Passed 6 - 0

****

Recusal:

Motion was made to recuse *Board Member Nolan Perry* from discussion and actions for Agenda Item No. 4.B.: 417 & 419 Raleigh Street - PIN 0666173158 & 0666174128 - REZ-2026-11

MOTION:	Michelle Peele
SECOND:	Jay Adcock
MOTION RESULT:	Motion Passed 5 - 0

****

Agenda Item No. 4.B.: Zoning Map Amendment - Mauldin-Watkins Surveying, PA - 417 & 419 Raleigh Street - PIN 0666173158 & 0666174128 - REZ-2026-11.

Purpose – The purpose of this agenda item is to consider a requested zoning map amendment for a total of 0.414 acres, located at 417 & 419 Raleigh Street, from the Residential Low Density (RLD) Zoning District to the Town Center Residential (TCR) Zoning District.

Staff Comments – *Planning Director Pam Davison* entered the agenda abstract and supporting documents for this agenda item into the official record of the Town.

Planning Director Pam Davison stated that the Town has received a number of inquiries and significant feedback regarding the rezoning request and therefore reviewed the purpose of the Town Center Residential (TCR) district. She explained that TCR applies to established areas just outside downtown with a long-standing mix of housing types and lot sizes, up to 10 dwelling units per acre, and that many lots in these areas, including 417 and 419 Raleigh Street, are nonconforming under current Residential Low Density and Residential Medium Density standards. She stated that such lots may either develop one single-family home under nonconforming lot of record standards or seek to rezone to TCR, which allows smaller setbacks and a mix of housing types in a more urban context. Rezoning to TCR has been a tool used for several new homes as well as expansions. She also noted that the Town does not regulate housing affordability and that decisions about reinvestment or redevelopment of individual properties are driven by the market, while TCR standards are intended to guide new development to remain compatible with existing neighborhood scale and infrastructure.

Planning Director Pam Davison stated that the purpose of the agenda item was to consider a zoning map amendment for approximately 0.414 acres at 417 and 419 Raleigh Street from Residential Low Density (RLD) Zoning District to the Town Center Residential (TCR) zoning district. She stated that a traffic impact analysis requirement was waived by the Engineering Director due to the limited scale of the project and negligible anticipated traffic impacts, and that each home would provide two required parking spaces in a rear alley-loaded garage with additional overflow parking likely accommodated in the private alley. She stated that the project does not trigger stormwater permitting because the difference in increased impervious surface area is so small that the state does not recognize it for permitting. She stated that the request is consistent with the 2040 Community Vision Land Use Plan and supports the following LUP policies: 2.1 which encourages infill development and redevelopment inside town limits as a way to reinvest in existing downtown and neighborhoods, and policy 4.1, which seeks to manage future growth and development in priority investment areas.

Recommendation – Staff recommends approval of REZ-2026-11, a zoning map amendment for 417 & 419 Raleigh Street, from the Residential Low Density (RLD) Zoning District to the Town Center Residential (TCR) Zoning District as it is reasonable and in the best interest of the public for the reasons identified by staff for the following reasons: 1) The requested zoning map amendment is consistent with the 2040 Community Vision Land Use Plan classification of Town Center Residential (TCR).2) The requested zoning district supports the LUP's Policy 2.1: Encourage Infill Development & Redevelopment Inside Town Limits.3) The requested zoning district supports the LUP's Policy 4.1: Manage Future Growth and Development in Accordance with the Priority Infrastructure Investment Areas Map.4) The proposed conditions offered as part of the petition align with the goals of the 2040 Land Use Plan and effectively plan for the site's future development potential.

Board Member Discussion – There was no Board discussion.

Public Hearing – The public hearing was opened.
Wayne Mauldin, Mauldin Watkins Surveying, 139 N. Main Street, spoke on behalf of the Petitioner. He stated that the two (2) existing lots currently contain a duplex in poor condition with termite damage, and that his client intends to purchase the property, demolish the duplex rather than repair it, and construct a higher-quality project. He stated that Town Center Residential (TCR) zoning could allow up to four (4) lots, but the proposal has been reduced to three (3) lots to provide more space and a better design. He stated that the homes would be served by a single rear alley access point to limit driveway access at the intersection given traffic concerns and stated he was available to answer questions from the Board.

Preston Perry, Pine State Group, 1994 NC 42 Hwy, spoke as the Petitioner. He spoke in support of the rezoning request for 417 and 419 Raleigh Street. He stated that the two (2) existing lots of record currently contain a dilapidated duplex with significant asbestos, termite damage, and structural issues, and that it is not economically viable to repair. He stated that the request is to rezone the property to Town Center Residential (TCR) zoning district in order to replace the duplex with three (3) detached single-family homes, and that although TCR could allow up to four (4) lots, they chose to limit the project to three (3) lots to provide more room and a higher-quality design. He stated that the proposal consists of three (3) single-family homes, each with a two-car garage accessed from a single shared rear alley, which would reduce the existing two (2) curb cuts on Raleigh Street to one (1) and is intended to promote parking in garages and the rear alley rather than on the street. He stated that they have held neighborhood meetings, received substantial feedback, and in response has offered conditional architectural standards, including a prohibition on vinyl siding, the use of durable exterior cladding materials (such as fiber cement, brick, stone, wood, or engineered composites), anti-monotony requirements so that each elevation is different, glazed front doors, a commitment to construct homes substantially similar to the conceptual elevations presented, and the planting of a street tree in front of each lot.

He stated that some objections referenced three-story, 5,000-square-foot homes, which are not being proposed, and that if the property remained two (2) lots under existing zoning, the resulting homes would likely need to be larger and taller and could be built closer to the lot lines without the same design controls. He stated that the three-lot plan is intended as a fair compromise that fits the mixed character of the area, supports walkability, addresses traffic concerns through consolidated access, and provides new housing opportunities, while acknowledging that affordability and gentrification cannot be directly controlled through a rezoning application. He stated that "this application is not an attempt to erase the neighborhood," that this is the neighborhood where he brought his daughter home from the hospital, and that the intent is to deliver a thoughtful, controlled infill project that replaces a deteriorated structure with three quality single-family homes under enforceable conditions on materials, architecture, landscaping, access, and use. He closed by stating that he was available to answer questions from the Board.

Chair Brett Johnson asked if there were any questions from the Board and then asked the applicant whether the visual elevations shown for the homes represented the style planned for all three houses or generally the type of design they intended to use.

Preston Perry stated that they are committed to constructing homes that are substantially similar to the elevations presented, noting that their architect has already provided renderings for the proposed designs.

Board Member Michelle Peele asked if they were detached.

Preston Perry stated that the proposed homes are detached single-family dwellings and that the three (3) doors shown on the front elevation are an architectural feature rather than an indication of attached units.

Board Member Tommy Pate stated that he initially thought the design appeared to show three (3) doors on the front of the house.

Preston Perry stated that the appearance of three doors on the front elevation was an architectural design element and added that he was not the designer. He stated that the proposed homes are three (3) single-family detached structures.

There were no further questions for the Petitioner by the Board Member.

Eric Christofferson, 504 E. Academy Street, stated that he has lived in the neighborhood for 26 years, regularly walks on Ennis and Raleigh streets, and is concerned about losing the neighborhood's "sense of place" as larger homes are introduced. He stated that he is not opposed to growth, infill, or missing middle housing but opposes the reduction of front setbacks from about 30 feet to 10 feet under Town Center Residential, which he believes is out of character with existing block faces and inconsistent with Land Use Plan guidance for generally consistent setbacks. He expressed concern that the tight rear access and driveway layout could lead residents to park on Raleigh Street, harming walkability and creating a public safety issue as vehicles mix with pedestrians. He also stated that the apparent size of the proposed homes appears too large for the neighborhood and asked that their size be reduced. He stated that many neighbors believe the Town Center Residential standards are too generous to new development at the expense of existing character and asked that growth be managed in smaller, more incremental steps.

Paul Hodge, 505 Raleigh Street, stated that he is not opposed to development or Town Center Residential zoning but is concerned that code compliance does not always reflect daily neighborhood conditions. He stated that, based on similar homes recently built nearby, residents often do not use garages for parking, and he asked that the rear driveway and pad be sized so that two vehicles can park side by side without blocking the alley, to avoid vehicles spilling onto Raleigh and Ennis streets. Mr. Hodge stated that on-street parking on Raleigh Street would reduce visibility

and walkability and create public safety concerns, especially given the narrow pavement width and the number of children now living in the area. He also expressed concern about stormwater, stating that relatively small changes in drainage can still cause significant impacts and cited a prior incident where blocked infrastructure and a water main break led to flooding and damage on his and a neighbor's property. He stated that he and other residents are asking that new development in the neighborhood be carried out responsibly.

Chanda DuPaul, 413 Raleigh Street, stated that she is opposed to the current plan as proposed by Pine State but is not opposed to growth or revitalization in general. She stated that her home is immediately next to the site and expressed concern that the reduced side setback of approximately five to five and a half feet would block light, visibility, and privacy now provided by the existing separation and mature crape myrtle trees, which also contribute to neighborhood beauty. She stated that the proposed homes appear very tall and large for the area and requested that the scale and height of the houses be reduced and that greater separation or a green buffer be provided along her property line, preferably by retaining trees but, if necessary, by some other form of screening, so that new development remains in keeping with the feel of the neighborhood.

Chair Brett Johnson asked Preston Perry, in light of the public comments about house size, what approximate square footage range the applicant was contemplating for the proposed homes.

Preston Perry stated that, while it was not being offered as a formal condition of the rezoning, the current proposal based on the sample elevations contemplates homes with a mean roof height of approximately 30 feet and an estimated conditioned floor area of about 3,015 square feet.

Chair Brett Johnson asked the *Clerk Eva Mayfield* to call the next person who signed up to speak either in favor or in opposition to the rezoning request.

Jim Hunsberger, 508 E. Academy Street, stated that he and his wife have lived in the "historic fringe" neighborhood for decades and that its largely intact character, with homes averaging over 70 years in age, is very important to residents. He stated that his survey of 34 nearby homes showed an average floor-area-to-lot ratio (FAR) of about 13–15 percent, and that, by his calculations, the proposed developments FAR would be more than triple that, which he believes is out of scale with the neighborhood. He also stated that mature trees and green space in the area provide significant shade, environmental benefits, and neighborhood character, and that their loss is a concern. Citing the 2040 Land Use Plan language about preserving existing neighborhood character and ensuring new homes are compatible in type, size, orientation, and intensity, and relatively small in scale, he stated that he does not see those principles reflected in the current proposal, although he is not opposed to infill or redevelopment of the existing, nonviable residence.

Maura Marini Shumake, 403 Raleigh Street, stated that the existing houses are older and will likely be torn down at some point, and that she understands TCR zoning is likely to move forward and appreciates the Town's broader economic objectives. She stated that her concern is with the

specific plans, describing the proposed houses as too close together, too close to the street, and not esthetically pleasing, and she asked the Board to reconsider the design and spacing. She also stated that she is concerned about the loss of truly affordable housing when older homes are demolished and replaced with higher-priced "attainable" housing, and she asked the Board to consider the needs of lower-wage "worker bee" residents, such as nurse aides and other essential service workers, who have limited housing options.

Ronald Maier, 104 Parker Drive, stated that he lives at the corner of Raleigh Street and Parker Drive and has already experienced increased runoff and water flow across his property from recent nearby redevelopment that added substantial concrete and impervious surface. He stated that the proposed project would create a nearly continuous band of concrete along the rear of the site and expressed concern about where that water would go, noting that Raleigh Street slopes downhill and that properties below could be affected by additional runoff. He stated that in another nearby development built by the same builder, none of the residents' park in their garages and instead park in their driveways, and he expressed concern that on-street parking at the corner, combined with existing traffic speeds, would create a public safety issue.

Laurie Chamberlain, 404 Wade Street, stated that she is not opposed to change or to the Town Center Residential zoning district, but is concerned about the proposed front setbacks and overall fit of the project within the neighborhood. She stated that most homes in the area have front setbacks of approximately 20 to 30 feet, and that placing new homes at a 10-foot setback would be out of character. She also referred to plans for future sidewalks and streetscape improvements on Raleigh Street and questioned how houses that are set so close to the street would look once sidewalks are installed. She stated that the proposed homes appear larger than typical homes in the neighborhood and asked the Board to consider slightly deeper setbacks and designs more consistent with existing houses.

Public hearing was closed with no further speakers.

Board Member Discussion – The Board Members went into discussion with Staff about how the proposed front setbacks and right-of-way dedication would affect the distance between the homes and the street and the feasibility of deeper setbacks while maintaining rear alley access and controlled parking. The Board also discussed how stormwater regulations apply to a 0.4-acre site and how any drainage concerns would be addressed if they were to occur, as well as expectations for trees and landscaping, including the applicant's commitment to provide a street tree on each lot.

Board Member Michelle Peele stated that the Board had heard many important points from the public but that, in considering the Town's goals and Land Use Plan and comparing what could be developed on the site under existing zoning to what is being proposed, she believed this proposal would be the best overall development for the area. She stated that new homes cannot realistically be built to look exactly like 70-year-old houses or match the neighborhood perfectly, but that she

felt the proposed homes and frontage would help blend in and invite residents who want to live closer to downtown in a walkable, close-knit community. She stated that the project would offer that opportunity and that she was willing to make a motion to approve the rezoning request unless other Board members had additional information to share.

There was no further information shared or discussions had. The board went into making the motion.

Motion – Recommend approval of REZ-2026-11, a zoning map amendment for 417 & 419 Raleigh Street, from the Residential Low Density (RLD) Zoning District to the Town Center Residential (TCR) Zoning District as it is reasonable and in the best interest of the public for the reasons identified by staff.

MOTION:	Michelle Peele
SECOND:	Jay Adcock
MOTION RESULT:	Motion Passed 5 - 0

****

Chair Brett Johnson welcomed *Board Member Nolan Perry* back to the Planning Board Meeting.

****

Agenda Item No. 4.C.: Zoning Map Amendment & Land Use Plan Amendment - Sampson-Bladen Oil Company, Inc - 2201, 2205 & a portion of 2221 Piney Grove Wilbon Road - PINs 0647825346, 0647825183, & a portion of 0647725066 - REZ-2026-12.

Purpose – The purpose of this agenda item is to consider a requested zoning map amendment for a total of 4.591 acres, located at 2201, 2205 & a portion of 2221 Piney Grove Wilbon Road, from the Neighborhood Commercial (NC) & Residential Agricultural (RA) Zoning Districts to the General Commercial Conditional Zoning District (GC-CZD) and corresponding Land Use Plan amendment from the Neighborhood Commercial (NC) classification to the Suburban Commercial (SC) classification.

Staff Comments – *Senior Planner Allyssa Holman* entered the agenda abstract and supporting documents for this agenda item into the official record of the Town.

Recommendation – Staff recommends approval of REZ-2026-12, zoning map amendment for a total of 4.591 acres, located at 2201, 2205 & a portion of 2221 Piney Grove Wilbon Road, from the Neighborhood Commercial (NC) & Residential Agricultural (RA) Zoning Districts to the General Commercial Conditional Zoning District (GC-CZD) and corresponding Land Use Plan amendment from the Neighborhood Commercial (NC) classification to the Suburban Commercial (SC)

classification as it is reasonable and in the best interest of the public for the reasons identified by staff for the following reasons: 1) Although the requested zoning map amendment is not consistent with the 2040 Community Vision Land Use Plan classification of Neighborhood Commercial (NC), the petitioner has opted to request a change of the Land Use Plan to Suburban Commercial (SC), which is compatible with the proposed zoning change. 2) The requested zoning district supports the LUP's Policy 2.6: Encourage Commercial Development. 3) The requested zoning district supports the LUP's Policy 4.1: Manage Future Growth and Development in Accordance with the Priority Infrastructure Investment Areas Map. 4) The proposed conditions offered as part of the petition align with the goals of the 2040 Land Use Plan and effectively plan for the site's future development potential.

Board Member Discussion – There was no Board discussion.

Public Hearing – The public hearing was opened.

John Adcock, Adcock Law Firm, 202 E. Academy Street, spoke as the Attorney representing the Applicant and property owner for the rezoning request. He stated that the application is to rezone the property so that an existing convenience store building, constructed in the 1950s, can be replaced with a modern convenience store that will include retail sales of gas and fuel. He stated that the current store lot is zoned Neighborhood Commercial, which does not permit a gas station use; if it did, the applicant would have simply expanded that existing zoning. He stated that while Neighborhood Commercial and General Commercial have similar permitted uses, a gas station is only allowed in General Commercial, and that General Commercial is identified in the Land Use Plan as consistent with the Suburban Commercial land use classification rather than Neighborhood Commercial, which is why a land use plan amendment is also requested. He stated that the purpose of the rezoning and land use amendment is to allow the existing store to be replaced with a modern facility that can sell fuel. He stated that a neighborhood meeting was held with notice to the Prescott Downs Homeowners Association, that no one attended, and that he later received an email from a Prescott Downs resident asking whether the project would be fenced, to which he responded that fencing was not planned. He stated he would be glad to answer questions from the Board.

Board Member Michelle Peele asked Staff whether this situation was the result of older land use classifications that, when the Land Use Plan was updated and new land use districts were created, left this property not aligned with the appropriate land use designation.

Planning Director Pam Davison stated that the Neighborhood Commercial designation has been on the property for a long time. She stated that a few years ago the Town created a specific "gas station" use, where previously such uses were treated as convenience stores with gas kiosks, and that when the new gas station use was added, Staff determined it should be permitted in the General Commercial District. She stated that this rezoning and associated land use plan

amendment are, in effect, bringing the property into alignment with the current permitted use tables.

Board Member Nolan Perry asked whether the small portion of the site that extends toward and abuts the Prescott neighborhood would be an area that people would regularly use or whether it was essentially excess land within the project.

John Adcock stated that the project will not use public sewer because it is almost a mile away and the cost to extend it would be prohibitive. He stated that the lot has been remapped and appears rather large for the use because an on-site septic system and associated repair field are required. He stated that, based on the site plan under review with the Town, the septic repair field is located to the south toward the Prescott neighborhood, while the new store building is pushed up toward the intersection.

Public hearing was closed with no further speakers.

Board Member Discussion – There was no Board discussion.

Motion – Recommend approval of REZ-2026-12, a zoning map amendment for 2201, 2205 & a portion of 2221 Piney Grove Wilbon Road, from the Neighborhood Commercial (NC) & Residential Agricultural (RA) Zoning Districts to the General Commercial Conditional Zoning District (GC-CZD) and corresponding Land Use Plan amendment from the Neighborhood Commercial (NC) classification to the Suburban Commercial (SC) classification as it is reasonable and in the best interest of the public for the reasons identified by staff.

MOTION:	Nolan Perry
SECOND:	Barbara Marchioni
MOTION RESULT:	Motion Passed 6 – 0

****

Agenda Item No. 4.D.: Zoning Map Amendment - M/I Homes of Raleigh, LLC - 0, 6921 & a portion of 6823 Sunset Lake Road - PINs 0667674582, 0667681140 & a portion of 0667589880 - REZ-2025-18.

Purpose – The purpose of this agenda item is to consider a requested zoning map amendment for a total of 27.63 acres, located at 0, 6921 & a portion of 6823 Sunset Lake Road from the Residential Medium Density Conditional Zoning District (RMD-CZD) to the Planned Unit Development (PUD) Zoning District.

Staff Comments – *Senior Planner Allyssa Holman* entered the agenda abstract and supporting documents for this agenda item into the official record of the Town.

Recommendation – Staff recommends approval of REZ-2025-18, a zoning map amendment for a total of 27.63 acres, located at 0, 6921 & a portion of 6823 Sunset Lake Road from the Residential Medium Density Conditional Zoning District (RMD-CZD) to the Planned Unit Development (PUD) Zoning District as it is reasonable and in the best interest of the public for the reasons identified by staff for the following reasons: 1) The requested zoning district supports the Land Use Plan Policy 3.1: Create a Comprehensive, Connected, and Continuous Network of Green Space. 2) The requested zoning district supports the Land Use Plan Policy 7.1: Establish a Discernible Neighborhood Structure. 3) The requested zoning district supports the Land Use Plan Policy 7.2: Encourage Transitional Uses and Intensities in and Around Project Boundaries. 4) The master plan and narrative included with the request ensure the future uses fits into the development context and demonstrate compliance with the zoning conditions offered and many of the goals of 2040 Land Use Plan.

Board Member Discussion – There was no Board discussion.

Public Hearing – The public hearing was opened.

John Adcock, Adcock Law Firm, 202 E. Academy Street, spoke as the Attorney representing the that he represents the applicant for the rezoning and that the applicant's representative was present to address questions. He stated that the proposed master-planned community has a density of approximately 1.77 units per acre, compared to an allowable density of 6 units per acre under the PUD standards, meaning the project is at about 30 percent of the maximum permitted density. He stated that while PUD standards require roughly 25 percent open space, this project proposes about 42 percent open space. He stated that the existing pond on the site has been cited with a notice of violation and is classified as a high-hazard dam, and that the project will remove or drain the pond, which he believes will be a significant public safety improvement, particularly for Ballantine Dairy Road. He then asked the applicant's representative, Juan, to address the Board.

Juan Montes, Director for M/I Homes of Raleigh, LLC, 1511 Sunday Drive, Suite 100, stated that he did not intend to take much of the Board's time and that, as John Adcock had indicated, they believe the project brings many positive elements to the neighborhood and fits the Land Use Plan. He thanked *Planning Director Pam Davison* and her Staff for working diligently with them and stated that he was present to introduce himself as the face of the project and to answer any questions from the Board.

David Shaw, 2017 Blainewood Ct., stated that he lives at the end of a cul-de-sac and stated as a longtime resident who regularly travels Sunset Lake Road, he believes the proposed development will add traffic to a corridor that is already heavily burdened and that Sunset Lake Road cannot support additional volumes in its current condition. He referenced Hilltop-Needmore Road down into Fuquay-Varina near the Harris Teeter as an example of existing congestion, stating that traffic backs up across the bridge even on the best of days. He stated that when he moved in 25 years ago,

residents were told the road and bridges would be upgraded to a parkway standard, which has not occurred, and that there has been insufficient forethought given to infrastructure. He stated that, although he supports growth and understands the need for housing, the project will aggravate an already difficult morning and afternoon commute unless there is a clear plan to improve or reroute traffic, and that it will increase frustration for existing residents.

Public hearing was closed with no further speakers.

Board Member Discussion – Board Members and Staff went into discussion about the traffic study and trip generation review for the project, including that Sunset Lake Road is designated as a 110-foot, four-lane, median-divided road and that the subdivision will be responsible for constructing half of that section, with an additional turn lane, along its frontage and along Ballentine Dairy Road. The project did not trigger a full Traffic Impact Analysis and instead qualified for a trip generation letter, which found that a TIA was not warranted and that no off-site intersection or signal improvements are required. The Board also discussed that nearby development (Randall Farms) will provide additional roadway and sidewalk improvements, including pedestrian accommodations, and that some roadway improvements will occur as growth proceeds in the corridor.

Motion – Recommend approval of REZ-2025-18, a zoning map amendment for 0, 6921 & a portion of 6823 Sunset Lake Road from the Residential Medium Density Conditional Zoning District (RMD-CZD) to the Planned Unit Development (PUD) Zoning District as it is reasonable and in the best interest of the public for the reasons identified by staff.
